

QUICKMARK PERMANENT MARKER

Part Number 1096 (10-70 Clamp)

The Easy & Low Cost Way to Mark Powerlines

The Quickmark is a permanent powerline warning marker that makes the line easily visible for anyone working in the vicinity.

The lightweight 260mm diameter bright orange plastic disc, with prismatic yellow center reflector identifies powerlines and applies no windage to the conductor as the disc swings out in a controlled and even manner and does not flap in the wind.

The durable plastic disc will not degrade under prolonged exposure and/or severe weather conditions.

- Ideal for construction sites, industrial plants, quarries or anywhere machinery can strike low hanging power lines
- Lightweight 260mm diameter orange plastic disc with prismatic centre reflector
- Moves with air currents to enhance visibility but will not flap
- Patented SnapFast spring clamp allow fast & simple installation by hot stick from the ground to any size conductor, either 10-70 or 6-16
- Prevents costly line damage & outages caused by collisions with high vehicles or loads
- Can be used on lines up to 115kV

Disclaimer:

May not stand prolonged high winds or cyclones

Part Number 1097 (6-16 Clamp)

Swinging action
