HAZARD MARKERS FOR POLES

Reduce car versus pole accidents by making obstructions near roads visible. They brilliantly reflect car headlights and also reflect street & moonlight. They can be glued or screwed to poles, traffic barriers, guard rails, buildings, columns, and bridges, etc. They form around wooden poles easily.

STANDARD HAZARD
MARKER
Part number 200

150 mm wide
x 375 long

OUR HAZARD MARKER SET IN A
CAVITY TO PREVENT REMOVAL

9.5m HAZARD MARKER
Part number 210
FORMED TO FIT INSIDE
A 9.5 M POLE AND
PREVENTS REMOVAL

Our hazard plates are made from treated corrosion resistant aluminium with a stable non-fading well proven UV resistant coating.

BEWARE OF IMITATIONS made from 3 year vinyl film which deteriorate quickly. They can be identified as they have rounded edges and are 155mm wide and do not meet Transit NZ standards. We use high quality class 1, 3M reflective patches.
